

Concrete / Asphalt Delivery Driver's Actions during Increased Traffic Periods

During normal traffic flow please follow the path marked with the blue dots to the Vehicle Inspection Facility and attempt to stay in the right-hand lane. If when you arrive traffic is stopped beyond the location marked with the yellow circle take the following actions:

1. Follow the path marked with the red dots to the guard booth.
2. Inform the gate guard you are hauling concrete/asphalt and provide them your ID.
3. A military member will guide you down the path marked with the red dots to the area marked with a red rectangle.
4. Park your vehicle, open all doors, fuel caps and any storage compartments.
5. Enter the Vehicle Inspection Facility and ensure you bring your ID, your driver's license, your vehicle's registration and your vehicle's insurance.
6. Inform the clerk behind the counter you are hauling concrete/asphalt, so we can get you checked in quickly while your vehicle is being inspected.
7. Once you are informed your vehicle is cleared proceed to your vehicle and ensure you close all opened compartments, especially the fuel cap.

Thank you for your assistance.
